

Possible consequences of unstable Atlas

In humans

1. Concentration and attention disorders
2. ADD and ADHD
3. KISS syndrome
4. Learning Disabilities
5. Not being present
6. Headache
7. Migraine
8. Chronic fatigue
9. Burn-out
10. Aphasia
11. inner restlessness
12. being too emotionally sensitive
13. Neck and back complaints - back pain
14. Stiffness
15. Being immobile
16. Headaches from cervical
17. Neck issues
18. Jaw misalignment and temporomandibular joint complaints (TMJ dysfunction)
19. Vision problems
20. Hearing disorders
21. Hip obliquity
22. Pelvic obliquity
23. Hip and knee joint complaints
24. Pain without apparent cause
25. Fibromyalgia
26. Rheumatoid arthritis
27. Osteoarthritis and arthritis
28. gout
29. Food intolerances: gluten and lactose intolerance
30. Diabetes 2
31. Dizziness
32. numbness in arms and legs
33. circulatory disorders
34. Carpal tunnel syndrome
35. Organic diseases of various kinds
36. Indigestion
37. Chronic diarrhea or constipation
38. Chronic Fatigue Syndrome (CFS)
39. Inner emptiness
40. Depression
41. Anxiety disorders
42. Aggression
43. Sleep Disorders
44. Low energy

In dogs

1. Stiff neck and head
2. Head turned to the right
3. Strained back
4. Bending the spine to defecate more difficult
5. Tail out of balance, uneven gait
6. Dog's body favors one side, spine appears curved
7. Claws worn unevenly
8. Restlessness and anxiety "Be overflowing"
9. Aggression and Behavioral problems
10. Biting
11. Fear
12. Indigestion
13. "Depression"

In cats

1. Bladder stones
2. Behavioral problems
3. Restlessness, aggression
4. Lack of flexibility in the body or tail
5. Pain
6. Depression

In horses

1. Head rotation to the left difficult
2. Shoulder lameness, saddle constraint
3. Lack of mobility in the neck and head area
4. Cough due to blockages in the neck and tongue base
5. Vertebral blockage of cervical spine, back stiffness
6. Lack of mobility in the middle back
7. Sensitive back with tension in the longitudinal muscle
8. Pelvic obliquity, blockages in the iliosacral joint,
9. Back to high up
10. Pain in the sternum area
11. Tension of the intercostal muscles, therefore respiratory restrictions
12. Tail to one side / problems with the dock
13. Inflammation and osteoarthritis / arthritis of the joints
14. Opposition in one direction, climbing and jacking
15. Nervousness and mental tension, anxiety
16. inner restlessness and lack of serenity
17. Behavioral problems such as shying for no apparent reason
18. Lack of communication ability or willingness with the rider
19. Unequal gait - "natural" skewness
20. Indigestion

For livestock

1. General health weakness and susceptibility to disease
2. Fertility - complicates pregnancy
3. Milk production
4. Agitation, aggression
5. Problems in the musculoskeletal system
6. Pain
